Onsite Education

Day Case Laparoscopic Hysterectomy

Theory and Lectures, Simulators and Active Participation in Surgical Theater

Date & Time

Day 1

2:00 pm – 6:00 pm Local Time

Day 2

7:45 – 3:30 pm Local Time

Training Venue

Day 1

Louros Seminar Room,
Mitera Hospital
Athens, Greece

Day 2

Mitera Hospital
Surgical Theater
Athens, Greece

Faculty

Dr Stefanos Chandakas
MD, MBA, PhD
Mitera Hospital
Athens, Greece

Program Description

The remarkable progression of hysteroscopic techniques and instruments has inspired the experts to design an intensive course with major attention to the hands-on training and live surgical demonstrations. The limited number of 8 participants and the established experience of the programme coordinators guarantee the most efficient learning effect.

Learning Objectives

The main idea for these advanced courses is a peer-to-peer concept. This means keeping the number of participants very low in order to further increase the level of interaction. Having only eight participants allows you to join Dr Stefanos Chandakas and his Faculty directly in the OR during the procedures as opposed to watching live surgery in lecture rooms.

Being in the OR facilities gives you the opportunity to observe the doctors, their operating room setup and the equipment they use.

Also, you have the chance to ask all your questions immediately. This is particularly attractive in this course as it takes place in the Mitera Hospital in Athens, where state of the art equipment and facilities are available.
